GALVANIZING TECHNOLOGIES & GERMAN ENGINEERING

## The World Leader in Hot-Dip Galvanizing Technologies

### Zinc Alloys

Alloys and Additives for Zinc Baths

### Degreasers

Acid and Alkaline Degreasers

### Inhibitors

Inhibitors and Additives for Pickling Acids

### Fluxes

For Hot-Dip Galvanizing

### Protectors

White Rust Protectors

### Consulting Services

For Galvanizers

### Front runner in Galvanizing Market

As one of the world's leading suppliers of chemicals and zinc alloys for the galvanizing industry, our main principles are: Efficiency, Flexibility and Vision towards the Future.

We develop new products for the galvanizing industry and in our portfolio we market and several specialty processes, recycle chemicals and also project and build galvanizing plants. Aside, Herwig is holds numerous patents in Galvanizing. Our personal involvement in this industry ensures state-of-the-art products, as a result of research and development and a comprehensive problem solving know-how, which makes our company the right companion for the Galvanizers.

### Research, development, and trade

Through active membership on several professional Galvanizing associations worldwide, we are committed to work in the best interests of the industry. In cooperation with international partner companies, we develop special zinc alloys and chemicals, with a quality that meets the highest requirements. Specialist knowledge and the latest research findings acquired through the close contact with our customers are successfully integrated in these processes.

Also, our company is constantly committing with even more strength to international markets, expanding and consolidating Herwig's global network of sales and partnerships. Thus, ensuring to our worldwide customers greater flexibility and greater market transparency.

## Herwig Worldwide

We show truly global presence. Being a proven specialist in the galvanizing sector, we are operating worldwide, providing a reliable technical consultation service and offering a broad spectrum of high-quality products.

We support our customers through our worldwide network of agents and representatives. Each member of this network operates at once independently and for the general good. We add our support in the form of training courses and joint visits on site. Customers all over the world have their own local contact partner – someone who can support them in their own national language and with an understanding of the local mentality and conditions. The times needed to react to customers' requirements and needs can thus be kept to a minimum.
