Company site

## Features and Advantages of Hessing's Equipment

The blow galvanizing equipment is used for continuous galvanizing of profile steel as tubes, guardrail, angles and rebars etc.

The round pipe size range is  $\Phi 20$ — $\Phi 325$  mm, square tube size 20X20—200X200 mm.

- ◆ Precise control and Easy operation
- ◆ Inner and outer surfaces are blown smooth
- ◆ The coating layer is even and adjustable
- ◆ High capacity and low production cost
- ◆ Less operators and less work load
- ◆ Environmental friendly and health care to operators
- ◆ 30 years experience in Galvanizing and 7X24 response

## Equipment manufactured by Hessing

- ◆ Continuous blow galvanizing equipment for pipes and tubes
- ◆ Continuous blow galvanizing equipment for guardrail beams
- ◆ Modification of pretreatment from open to enclosed
- ◆ Modification of all kinds of galvanizing equipment
- ◆ Zinc kettle and FRP tanks
- ◆ Pipe post-treatment equipment including auto threading machine, auto socketing machine, hydrostatic tester, straightener, end facing etc.
